José Cotrim

Automation & Software Engineer

960 251 458 | cotrim.ze@gmail.com | Vila do Conde, Porto | linkedin.com/in/jose-cotrim | https://cotrim50.github.io/

PROFESSIONAL OVERVIEW

.NET Software Engineer with 2+ years experience developing production-grade applications using C#, .NET, WPF, Entity Framework and SQL Server for industrial environments. Skilled in software integration, Git, Azure DevOps and CI/CD within Agile environments. Interest in Azure and cloud technologies.

WORK EXPERIENCE

AUTOMATION & SOFTWARE ENGINEER | Preh, Trofa NOV 2025 – PRESENT

- Led the modernization of legacy industrial desktop applications to a web-based architecture (Angular, ASP.NET Core, Entity Framework Core), keeping integration with machine vision, traceability databases and production equipment.
- Developed .NET (WPF/MVVM) applications for manufacturing traceability and configurable production-line parameterization using SQL Server, stored procedures and JSON, eliminating recompilation for production changes.
- Built machine vision applications with MVTec Halcon, .NET WinUI, Entity Framework and SQL Server (defect detection, brightness analysis, symbol verification), with reusable Halcon libraries packaged as NuGet and deployed as Windows services.
- Developed Beckhoff TwinCAT 3 automation applications and integrated industrial equipment via CAN, Ethernet and MQTT.
- Migrated safety architectures from ABB Pluto to Beckhoff TwinSAFE (safety I/O, safety relays, electrical schematics, machine validation).
- Developed, commissioned and validated automated production lines and stations for Mercedes-Benz, integrating machine vision, PLCs, test equipment and traceability databases.

PRODUCT DEVELOPMENT ENGINEER | INEGI, Porto SEP 2024 – OCT 2025

- Developed a real-time ergonomic posture analysis system in Python (ZED 2i, ZED SDK body tracking), assessing trunk, head and arm posture and sitting/standing state from 3D keypoints.
- Automated PDF/JSON reports with posture statistics and charts, plus an anonymization algorithm to protect workers' privacy.
- Developed a Universal Robots UR5 collaborative robot program demonstrating human–robot collaboration.

EDUCATION

MSc in Automation Engineering | Faculty of Engineering of University of Porto (FEUP), Porto Graduated: 2024
BSc in Mechanical Engineering | Faculty of Engineering of University of Porto (FEUP), Porto Graduated: 2022

SKILLS

C#, .NET, TwinCAT 3, Codesys, ASP.NET Core, Angular, Docker, MVTec Halcon, TwinSAFE, WPF, SQL Server, REST APIs, MVVM, Entity Framework, Azure DevOps, Python, ST/FBD/Ladder, LabVIEW, Siemens TIA Portal, MQTT

LANGUAGES

Portuguese Native, **English** C1, **German** A2
